

NubiApps

The most purple app
ever!
I mean... ever!

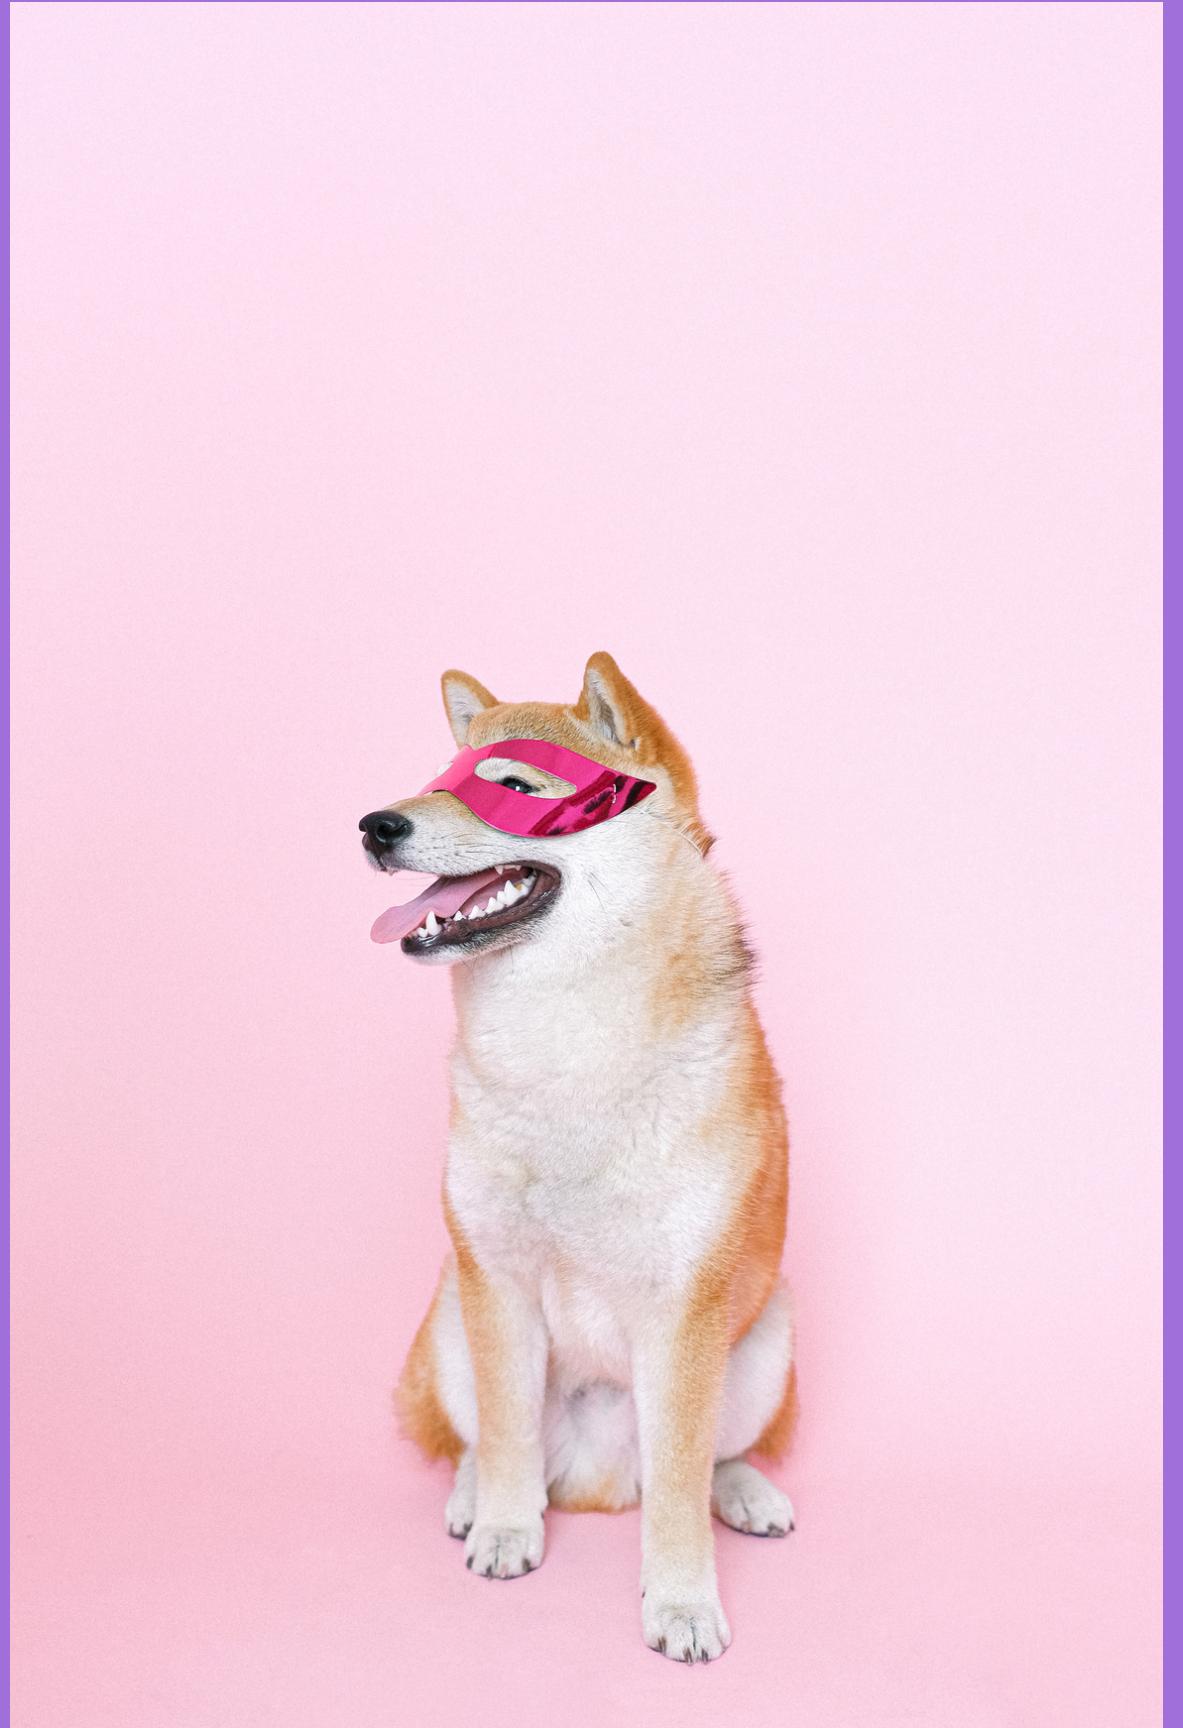

Motivation & Idea

- Solve a problem that i face on a day-to-day
- Reduce the time spent on designing features
- Create something i could actually use
- Get feedback from colleagues
- Endless list of future-features

Key learnings:

- Use available stuff, but test how they work
- Break problems down to the smallest components and solve them the dumbest way possible
 - GET INTO TESTING!
 - Accept that it's never perfect

Cool prebuilt things:

- React big calendar
- React time picker
- React Hook Form
- Formik
- Zod
- Yup

**Thanks a lot, you guys are the
best!**
